SKATER MEASUREMENTS

To measure on your own, please follow the following instructions. Skaters should not wear overly bulky clothing when being measured, but measurements should not be taken too snugly also so as to allow for some growth.

1. With arms straight out to side, place tape measure around each of the following: 1) chest, 2) waist, and 3) hips making sure each measurement is in the fullest part of the body. The measurements should be comfortable and not tight.
2. The (4) * **girth** measurement is as follows: Place the beginning of the tape measure on the child's left shoulder. Keep the tape secure at the shoulder and go down the front of the body, through the crotch **and** up the back to the same left shoulder where you're holding the other end of the tape measure. **This is the most important measurement. It should be at least 40"!**
