On 06/25/2025 at approximately 1327 hours, I Officer Barnum was dispatched to the intersection of Old Shakopee Rd W. and Highway 169 for a motor vehicle hit and run.

Prior to arrival, dispatch informed me that the suspect vehicle, described as a green SUV (MN license plate HEH939) failed stop and was traveling east on Old Shakopee Rd.

On the way to the call, I did not see a vehicle matching that plate or description.

Once on scene, I made contact Unit 2 who's vehicle can be described as a silver, 2010, Mazda 3, (MN:LHL594).

At this time, I asked Unit 2 what had happened.

Unit 2 Stated that On 06/25/2025 at approximately 1327 hours, they exited from Highway 169 northbound at Old Shakopee Rd W. Once exiting the ramp, they turned east bound on Old Shakopee Rd W. When they turned, they turned into the right lane. Unit 2 then changed lanes into the left lane. Upon doing so, a vehicle which they described as a green SUV (MN#HEH939) struck them. Unit 2 stated the suspects vehicle struck the drivers side front wheel area. They believed that the suspects passenger side was where there would be damage. Unit 2 was unsure on where it would exactly be due to hit happening so fast. Unit 2 stated the vehicle made no attempt to stop and drove away.

Unit two was unable to obtain any suspect description of further description of the vehicle due to the heavy rain.

Unit two's vehicle had moderate damage above the drivers side wheel and near the drivers side front bumper. It also appeared that there was minor damage to the rim of the vehicle as well. No airbags were deployed and a tow was not required. Unit 2 stated that they were not injured during the accident.

Pictures taken at the scene.

On 6/29/2025 at approximately 0200 hours, a severe storm hit the area which caused a loss of power to a large area of the city, including the area of this crash, American Blvd / Nicollet Ave S. This intersection was completely dark with no semaphores or stop signs controlling the intersection.

Due to both drivers having sustained suspected head injuries, the sequence of events isn't fully known.

It is possible that unit 2 was traveling east on American approaching the intersection, while unit 1 was traveling north. Due to the darkness and no control devices at the intersection, the units collided and came to rest in the south east quadrant of the intersection.

The diagram will show the final resting location each vehicle was found in.
