COMBINED FIVE-YEAR CIP

2016-2020

ORGANIZATION

Administration

Overview

The Community Investment Program (CIP) is a planning tool based on long-range physical planning and financial projections that forecast the City of Bloomington (City), the Bloomington Port Authority (Port), and Housing and Redevelopment Authority for the City of Bloomington (HRA) capital needs over a five-year period as building blocks to help achieve the City's strategic vision and mission. The CIP includes a detailed description of every Capital Project anticipated to be initiated during the five-year period.

Community Vision

To build and renew the community by providing services promoting renewal and guiding growth in an even more sustainable, fiscally sound manner.

Organization Mission

A professional, productive, learning organization that builds and renews the community by providing quality services at an affordable price.

Community Investment Program Goals

- Maintain a systematic approach to planning and initiating capital projects affording the opportunity to plan the location, timing, and financing of the needed public improvements.
- Development of a realistic program of capital spending with the projected fiscal capability to finance such projects, avoiding sharp changes in the tax levy or bonded indebtedness.
- Enable the City, Port and HRA to evaluate the needs of the entire City on a strategically oriented framework.
- Coordinate the capital needs with the adopted Comprehensive Plan.
- Maintain awareness with the public and private investors of the scope of the City's capital improvements.
- Enhance opportunities for participation in federal and/or state grant and aid programs.

The CIP continues to evolve as project planning needs to respond to strategic community direction. Changes in economic conditions or other project related issues may alter timelines. Funding mechanisms change and projects become more or less feasible based on such funding changes. City management continuously looks for opportunities for efficiency which often change the projected needs for capital.

The CIP is updated annually to ensure consistency and the reflection of changing strategic needs, cost fluctuations, and financial resources. The CIP document incorporating the recommended changes is then submitted to the City Council for consideration, modification, and adoption.

During the preparation and review of the recommended CIP, City management staff employed experience-based judgment to identify which projects can be accomplished in a given year, within the limits of the City's control. As would be expected, the data available and therefore the expenditure estimate for earlier years are more precise than latter years. Numerous sources are

drawn upon to develop the expenditures included within this document including plans and/or studies completed or currently in process.

The CIP neither appropriates funds nor authorizes projects. The City Council must act to initiate each project over \$100,000. The City Manager may initiate projects for less than \$100,000. Projects will only be initiated when sources of funding are available as budgeted.

The City's capital budget is a significant part of the 2016 Budget. It represents costs associated with capital projects in the first year of the 2016-2020 CIP. Such projects may include land acquisition, the construction and acquisition of new buildings, additions to or renovations of existing buildings, construction or reconstruction of street and utility infrastructure, and major equipment purchases.

On the following pages information identifying the CIP funding sources, priority definitions, project department, and our sustainability categories are included to assist the reader's in understanding the Capital Improvement needs of the City of Bloomington

Funding Sources

Funding sources for this CIP include the following:

4110 Infrastructure Replacement	6550 Aquatics	PIR Bonds & Assessments
4120 PMP Reconstruction	7700 Facilities & Park Maintenance	State & Met Council Grants & Funds
4130 State Aid- Local	Bonds Enterprise GO	State (DNR) Funds
4140 State Aid- ROW Acquisition	Charter Bonds	State (TED) Grant
4200 Capital & Strategic Priorities	CIP Bonds	State Gas Tax
4300 South Loop Development	Construction	State Grants & Funds
4400 Park Development	Federal Grants & Fund	Tax Abatement
6400 Golf Courses	Franchise Fees	Tax Increment
6450 Ice Garden	Hennepin County	Utilities
6500 Art Center	Local Government Funds & Grants	

Priority Definition

- Priority 1 – Projects that are expected to be completed in 2016 and financing is available or will be obtained from grants applied for.
- Priority 2 – Projects that may be completed in 2016.
- Priority 3 – Projects that may be completed in 2016 if extended funding happens to be available in 2015 but may also be funded in later years or may not otherwise be funded yet.

Community Strategic Investment Areas

The projects are broken into eight Community Strategic Investment Areas: Alternative Transportation (AT), City Facilities (CF), Park Acquisition (PA), Park Development (PD), Sewer, Water and Stormwater (SW), South Loop/Port Authority (SL) and Surface Transportation (ST).

Project Numbers

The project numbers include the letters for the project department (explained above) and a five-digit number. The first two digits are for the year the project was first placed on the CIP and the last three digits are the order in which they were listed. Some projects have a different project number than that explained above. Those projects are included in the City's accounting system and were assigned that number by Finance for tracking of expenses.

Sustainability Categories

Projects are assigned a sustainability category along with a subcategory as defined below in accordance with the City Council's goals and strategies.

Sustainability

Meeting the needs of the present without compromising the ability of future generations to meet their own needs

Categories:

Environmental – Protects and preserves natural resources, provides stewardship of natural resources for future generations; advances corrective measures where necessary.

Economic – Protects and preserves financial resources; utilizes financial resources in a manner that does not place an unfair or unreasonable burden on future generations; uses resources in a manner that enhances the potential for future economic growth.

Social and Cultural – Protects, preserves and enhances quality of life resources; promotes stewardship of community history, arts, culture and a sense of community for future generations; provides equal access to housing, education, and public services regardless of age, ethnicity, disability, and socio-economic status.

Subcategories:

Renewal – An activity or expenditure that improves existing infrastructure; restores or replaces damaged or decaying assets; and, addresses conditions of decline.

Community Building – An activity or expenditure that promotes the ability of people to gather together and develop a sense of connection to each other.

Infrastructure – An activity or expenditure for construction of first-time capital assets as opposed to renewal.

Services – An activity or expenditure that provides labor, talent, training and tools to fulfill a need in the community as determined by the City Council.

Mission Statement

Community Vision

To build and renew the community from the comprehensive plan by providing services, promoting community renewal and guiding growth in even more sustainable, fiscally sound ways.

Council's Goals and Strategies

Bloomington's vision recognizes that the City needs to grow and operate in a healthy, sustainable manner that meets the needs of today without reducing the ability of future generations to meet their own needs.

The City's sustainable strategies address energy use, accessibility, green infrastructure, choice of housing and transportation options and emphasis on using local and regional resources.

Land Use -

- Focus commercial and residential growth in three mixed use districts (South Loop, Penn/American, and Normandale Lake) where it can be served by transit, encourage short-trip lengths, promote biking and walking and reduce vehicle miles traveled.

Transportation -

- Support transit improvements including additional transit service.
- Update and continue further implementation of the *Alternative Transportation Plan* including the creation of bikeway, walkway and other non-motorized networks and their interfaces with transit and commercial and recreational destinations, promoting greater physical activity throughout the community.
- Operate a Pavement Management Plan to adequately renew the transportation infrastructure in the most cost effective manner.
- Encourage shared parking among land uses and developments.

Housing -

- Continue to guide new high-density housing toward locations near transit, services, amenities and employment.
- Continue to encourage higher densities where appropriate as redevelopment occurs.

Utilities -

- Further reduce energy and resource consumption by decreasing inflow and infiltration into the sanitary system and by encouraging water conservation.
- Continue to protect water quality using best management practices for surface and subsurface water.
- Further implement the utility asset management program to preserve the excellent condition of Bloomington's utilities in the most cost effective manner.

Organizational Strength -

- Maintain a strong, sustainable organization in terms of the quality and affordability of services, financial strength and the professionalism and productivity of its operations.
- Make community investments that in turn encourage private investments consistent with the City's sustainability objectives.

Organization Mission

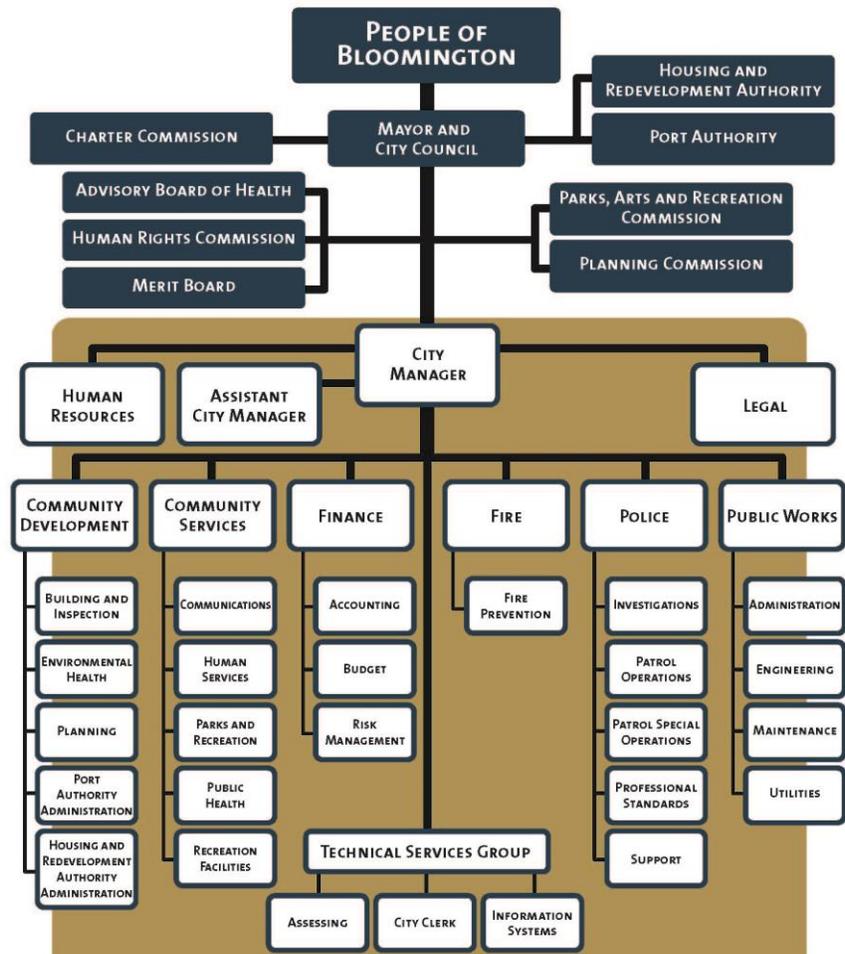

A professional, productive, learning organization that builds and renews the community by providing quality services at an affordable price.

Organization Structure and Chart

The home rule charter was adopted in November 1960. The City is a Council-Manager form of municipal government. The Council is comprised of the Mayor and six Council Members who serve four-year terms; the Mayor and two members are elected at large, the rest are elected by district. The City Manager, the chief administrative officer, is selected by the Council to serve an indefinite term. The City Manager controls and directs the administration of the City's affairs and supervises all departments and divisions.

Activities are managed through eight departments, each with a director appointed by and reporting to the City Manager. A description of the departments and their functions is included in this document. Within each department are several divisions managed by program managers who report to the directors. A description of each program, its objectives and budget is also in this document.

Cross-functional teams study, prioritize and implement projects throughout the year. For example, the Steering Committee, comprised of the City Manager and Department Directors, meets on citywide information systems, assessing and licensing policy, and operational matters. Other teams focus on issues such as neighborhood cleanup compliance, capital planning, liquor code enforcement, transportation, emergency preparedness and facility needs, among others.

COMBINED FIVE-YEAR CIP

2016-2020

POLICIES

Community Investment Program Policy

This Community Investment Program constitutes the capital improvement plan of the City of Bloomington prepared and adopted in accordance with the provisions of Minnesota Statutes, Section 475.521, as amended.

The City will develop a multi-year plan for capital improvements and update it annually. The two-year budget capital improvement will be approved and incorporated into the operating budgets. The following year's budget will be adopted with the year after that conceptually approved on a cycle consistent with the operating budgets.

The City will identify the estimated cost and potential funding sources for each capital project proposal before it is submitted to the Council for approval and in that process will determine the most effective financing method for the proposed project. All construction projects shall include at least a ten percent contingency prior to receiving bids and at least five percent upon acceptance of the bid.

The City will make all capital improvements in accordance with the adopted capital improvement program, or as it is amended by the Council. Capital purchases, not otherwise funded through an approved budget, shall require City Council approval.

The City will enact each two-year capital improvement program based on a rolling multi-year capital improvement plan update.

The City will coordinate development of the capital improvement budget with the development of the operating budget. Future operating costs associated with new capital improvements will be projected and included in operating budget forecasts.

The City will use inter-governmental assistance to finance only those capital improvements that are consistent with the capital improvement plan and City priorities, and whose operating and maintenance costs have been included in operating budget forecasts.

The City will maintain all its assets at a level adequate to protect the City's and its citizens' capital investment and to minimize future maintenance and replacement costs.

Debt Policy

The City will confine long-term borrowing to capital improvements, equipment or projects that have a life of more than 4 years and cannot be financed from current revenues.

The City will endeavor to keep the total maturity length of general obligation bonds below 20 years and at least 50% of the principal shall be retired within 10 years. In all cases, the maturity shall be shorter than the life of the related assets.

Total net (after deducting sinking funds and reserves) general obligation debt (net of utilities supported portion and any portion supported by others, such as the State of Minnesota) shall not exceed 75% of the dollars per capita debt limit for the current year. For example, the 2013 per capita debt limit was \$3,461, which translates into a cap of \$ 2,596. Net debt as defined here is to include Port Authority and HRA debt.

Net general obligation debt (as defined above) will not exceed the statutory limit of 2% of the estimated Full Market Value of taxable property in the City as required by Minnesota Statute, Section 475.53.

Where possible, the City will use revenue (including G.O. backed revenue) or other self-supporting type bonds instead of general obligation bonds.

The City will not use long-term debt for current operations (including repairs).

The City will maintain frequent and regular communications with bond rating agencies about its financial condition and will follow a policy of full disclosure in every financial report and bond prospectus. The City will comply with Securities Exchange Commission (SEC) reporting requirements.

The City will strive to maintain a full funding policy for the Fire pension plan (no unfunded liability) and will maintain a continuing overview of the investments of the Fire plan. The City will aggressively protect its rights to any positive balance in the Fire Relief Funds. Where appropriate, the City will utilize the 10% reduction allowed by Minnesota Statute, Section 69.773, Subd. 4, to reduce the Fire Pension tax levy. Any unfunded actuarial accrued liability calculated will be amortized over a period of 20 years effective December 31 in the year of the change according to Minnesota Statute, Section 69.773, Subd. 4.

Interfund borrowing for periods of more than one year shall only be undertaken for capital expenditures. A reasonable payment schedule for repayment of the borrowed amounts and enforceable covenants, established to ensure recourse if the schedule is not adhered to, shall be approved by the City Council. Interest charges shall be included to compensate the lender for the use of its financial resources. Interest charges for interfund loans utilizing tax increment bonding will follow Minnesota Statutes, Section 469.178, Subd. 7.

Interfund borrowing that does not meet the criteria noted above shall not be considered as a loan in financial reports.

Tax Increment Policy

1. The City Council is the coordinating governmental unit in the City of Bloomington for the review and fiscal control of all tax increment financing within the City.
2. Tax increment financed projects, and all other capital projects, of the Port Authority and the Housing and Redevelopment Authority shall be included in the City's 5-Year Capital Improvement Program each year for prioritizing.
3. The City will not approve any new tax increment district or abatement district if the resulting total projected tax capacity (net of estimated Fiscal Disparities Contribution) of all tax increment districts in the City (including the proposed district) exceeds 15.0 % of the total projected tax capacity of all taxable property (including the proposed district) in the City. Further, this 15.0% shall be considered allocated between the City's component governmental units as follows:

City	1.25%
Port Authority	12.50%
HRA	<u>1.25%</u>
Total	15.00%

Any proposed alteration of this allocation can only be changed by a 5/7 vote of the full City Council.

4. The City will not consider tax increment financing requests for retail, service, industrial, hotel or office development projects that lie outside City approved redevelopment or economic development districts.
5. Types of tax increment financing:
 - (a) Tax increment financing will not, unless approved by a 5/7 vote of the full City Council, be guaranteed or backed by the full faith, credit, and taxing power of the City, but instead will be payable solely from the related tax increment revenue.
 - (b) General obligation backed, or tax levy supplemented, tax increment financing is to be used only in those cases where it is found, by a 5/7 vote of the full City Council, that:
 - (i) Such G.O. backed financing will not, in the opinion of the Council, place an undue burden on:
 - Tax rates
 - Relative debt load (as expressed in terms of per capita debt, or as a percentage of debt to Assessor's Market Value), and

- (ii) No other, better, financing alternative exists, and
- (iii) There is a very significant rate of return relative to the risk taken or if it is found that there are overriding socioeconomic considerations which are significant to the City overall, as determined by the City Council.

6. As required by State law, each and any tax increment financing (TIF) proposal will be reviewed with Hennepin County and the Bloomington School District (ISD #271), or any other affected school district, prior to implementation or change. Response from these agencies received within 30 days of notification, if any, shall be forwarded to the City Council prior to approval of the plan. The City will take into consideration any official county request to fund county road costs resulting from the tax increment plan. If funds for the project are not sufficient to cover such expenditures, the TIF plan would not proceed.
7. The City, the HRA or the Port Authority, as appropriate, will charge a developer an application fee in accordance with the City's Fees and Charges Schedule as approved annually by the City Council to recover full costs related to Staff review time and expenses relative to analysis of any proposed plan.

COMBINED FIVE-YEAR CIP

Project #	At-14-001
Project Name	Nokomis - MN River Regional Trail

Total Project Cost: \$722,690

Description
Construction of .75 miles of an off-road bikeway facility along Old Cedar Ave from 86th Street to Old Shakopee Road.

Justification
This is part of a regional trail system that will connect to the Old Cedar Ave Bridge crossing the Minnesota River to the Intercity Trail north of 86th Stree. It is part of the Alternative Transportation Plan and a federal transportation grant was awarded to Three Rivers Park District for this project.

Expenditures	2016	2017	2018	2019	2020	Total

Project #	AT-15-001
Project Name	East Bloomington Freeway Sidewalk (106th - 99th)

Total Project Cost: \$660,000

Description
The proposed project would construct a six-foot wide sidewalk along the west side of East Bloomington Freeway between W 106th Street and W 99th Street as well as provide pedestrian improvements along W 106th Street, including pedestrian signal enhancements, curb radius modifications, sidewalk widening and lighting under the 35W bridge.

Justification
The proposed pedestrian project in this area is identified in the Alternative Transportation Plan and in the Safe Routes to School Plan. The construction of these pedestrian facilities will fill a critical gap in the sidewalk network and increase safety for non-motorized travelers in the area, including access to the Oak Grove School campus and the South Bloomington Transit Center and Lyndale area retail node. A funding application has been submitted for federal surface transportation funds to support this project.

Project #	AT-16-001
Project Name	MN River Valley Connections

Total Project Cost: \$800,000

Description
Provide safe and efficient connections to the Minnesota River Valley via on-road and off-road facilities connecting to Bloomington's Alternative Transportation System.
-Wayfinding and Signage: Design and install a wayfinding signage system in the areas leading to both the major and minor trailheads connecting to the MN River Valley and State Trail.
-Cedar Avenue: Complete the trail connection from the Nokomis-MN River Regional Trail between Old Shakopee Road and the Old Cedar Avenue Bridge trailhead.
-Lyndale Trailhead (Sorenson Boat Launch): Provide a vital 35W bike connection between Bloomington and Burnsville by installing amenities, signage and a bike lane to the north of the Lyndale Avenue trailhead.
-US Fish and Wildlife Headquarters Trailhead Area: Provide kiosk, signage, biking amenities, and bike lanes in the area leading to this trailhead.
-Mound Springs Trailhead: Provide trail access, signage, parking and other amenities at this trailhead.

Justification

Project #	AT-16-005
Project Name	Nokomis - MN River Trail

Total Project Cost: \$1,520,000

Description
Construction of new trail segments that will connect to Old Shakopee Road to the future DNR State Trail.

Justification
This trail will connect to the newly rehabilitated bridge #3145 over Long Meadow Lake. The project provides a non-motorized trail connection between Hennepin and Dakota Counties Regional Trail System via the existing pedestrian/bike bridge at Trunk Highway 77/Cedar Ave Bridge. It will also connect to the next segment of Nokomis-Minnesota River Trail that will be constructed by Three Rivers Park District which will complete the route.

Project #	AT-16-006
Project Name	Old Cedar Ave Trailhead

Total Project Cost: \$2,820,000

Description
Reconstruction of the existing US Fish and Wildlife Service parking lot. Construction of a park restroom facility and other trailhead signage and amenities.

Justification
As the Nokomis-Minnesota Rucer Trail is completed it is expected that the number of visitors to the area will increase. Signage is necessary as three different trails come together here. Providing additional amenities enhances the user experience.

Project #	SB-99-013
Project Name	Minnesota Valley State Trail

Total Project Cost: \$2,500,000

Description
Install State trail along Minnesota River from the MN Wildlife Refuge Headquarters to the Bloomington Ferry Bridge. Funding for the project to be provided by the MnDNR. Approximately 70,500 l.f. at \$35.46/l.f. = \$2,500,000 (MnDNR estimate).

Justification
Provide amenities to better serve park users and provide ADA complaint access. Part of the 1969 State Legislature approved plan to provide trails between Ft. Snelling and the City of LeSeuer.

Expenditures	2016	2017	2018	2019	2020	Total

Project # ST-99-001
Project Name Old Cedar Avenue Bridge Rehabilitation

Total Project Cost: \$19,830,000

Description

Replace/Rehabilitate the Old Cedar Avenue Bridge #3145 over Long Meadow Lake. Project construction began in 2015.

Justification

Bridge has reached its useful service life. The project provides a bridge connection between Hennepin and Dakota Counties regional trail system via the ped/bike bridge that hangs below the Hwy 77/Cedar Ave Bridge.

Rehabilitation is the only acceptable alternative from the regulatory/permit agencies perspective.

Project #	CF-07-001
Project Name	Community Center

Total Project Cost: \$41,454,726

Description
<p>Construct a community services center to replace the Creekside Community Center to accommodate Human Services and Parks and Recreation programs and facilities. The center may also provide space for Public Health and Motor Vehicle services as well as indoor aquatics. A community center needs assessment completed in April 2015 found the following space needs could be served by a new community center:</p> <ul style="list-style-type: none"> Large Multi-purpose room Indoor playground Multi-use classrooms Running/walking track Gymnasium and fitness areas

Justification
<p>Creekside Community Center was originally built as an elementary school in 1960. The City purchased the building in 1974 and converted it into a community center. The building is limiting opportunities for the City to better meet the needs of its residents. The community center needs assessment found that the lack of flexibility to modify room sizes and heights and the significant cost to correct existing problems justified the need to look for a new location to accommodate the City's community center programming. A new location would allow the facility to be right-sized, accessible, purpose-built and energy-efficient for the long-term benefit of the community.</p>

Project #	CF-14-002
Project Name	BCFA - Replace Electronic Reader Board Sign

Total Project Cost: \$50,000

Description
Replace the electronic reader board sign located on the City grounds facing 98th Street with a more serviceable sign at an estimated cost of \$45,000 plus a 10% contingency.

Justification
Replace sign that is reaching its useful life. Manufacturer of current sign has gone out of business, so obtaining service and/or replacement parts is problematic.

Project #	CF-16-001
Project Name	Fire Station 2

Total Project Cost: \$4,000,000

Description
 Fire Station 2 was built in 1968 and has three bays totaling 4,474 square feet. This station lacks training/classroom space, and requires kitchen and bathroom upgrades. An additional bay would be included in this project. This upgrade is necessary to meet ongoing and future needs of the fire department.

Justification
 The building is not meeting the needs of the fire department. There is inadequate meeting space and needs crucial facility updates. The roof, skylight domes, rooftop heating and cooling unit, water heater, restrooms, and flooring have all been identified by VFA Facility software as priority for the next two years.

Project #	CF-16-005
Project Name	New Equipment Maintenance Garage

Total Project Cost: \$12,000,000

Description
 New equipment garage/maintenance garage is approximately 40,000 square feet. This new building may include the central warehouse, parts room, as well as lockers and restrooms. This cost does not include any land acquisition that may be required.

Justification
 The work load and larger size of vehicles has exceeded the capacity of the current garage. Due to space constraints technology and safety improvements are limited.

Project #	CF-16-007
Project Name	Ice Garden Locker Room Remodel

Total Project Cost: \$600,000

Description
Renovate the existing locker rooms and showers in Rinks #1 and 2 at the Bloomington Ice Garden.

Justification
The locker rooms and showers at Rinks #1 and 2 have had minimal improvements over the years since the Ice Garden was opened with one rink in 1970. Changes to the existing locker room layout would include improved toilet and shower facilities as well as more functional entrances and shared spaces. The project would also separate the male and female locker rooms in Rinks #1 and 2 and make them more secure.

Project #	CF-16-009
Project Name	Ice Garden Rink #2 Viewing Area

Total Project Cost: \$190,000

Description
Construct a spectator viewing area on the west end of Rink #2 at the Bloomington Ice Garden.

Justification
Creating a seating section at the west end of Rink #2 would provide a warm viewing area at board-side to allow spectators to get closer to the action while moving them out of the primary concourse. Installing a counter for food and drinks and adding chairs and stools would make this a prime seating location for spectators during big games and performances as well as for parents during practice sessions. The viewing area would also improve traffic flow and safety by moving spectators outside of the main corridor, which becomes congested during games and tournaments.

Project #	CF-16-013
Project Name	Dwan Clubhouse Restroom Remodel

Total Project Cost: \$60,000

Description
 Completely remodel the men’s and women’s restrooms at the Dwan clubhouse to update them to better serve patrons. Install new toilets, vanities, sinks, fixtures and tile, and reconfigure both rooms to make them more functional and appealing to customers.

Justification
 The restrooms have had modest improvements over the years since the Dwan clubhouse was remodeled in 1987. The restrooms have become outdated and are in need of improvements. The restroom remodeling project offers the opportunity to not only update the facilities but also to redesign both to make them more functional for patrons.

Project #	CF-16-019
Project Name	Cemetery Columbaria

Total Project Cost: \$387,000

Description
 Construct a site for columbarium to be placed at the cemetery. Construction will include ground work, sidewalks, benches and plantings which include footings for twelve columbaria. During this initial phase, only four units will be purchased and placed. This also includes adding a new road and turn around.

Justification
 At the present time, the cemetery's only offering for cremains is to place them in grave sites. This project offers choices for cremains and expands the capacity of the cemetery. The road is necessary to allow for better access and traffic flow with the expansion of the cemetery.

Project #	CF-16-020
Project Name	District Court Building

Total Project Cost: \$13,100,000

Description

Construction of a replacement to the Southdale District Court building on the Bloomington Civic Plaza site. Hennepin County will fund the construction of the building which will be owned by the City of Bloomington and leased to the County.

The proposed 28,000 square foot District Court building is estimated to cost \$13.1 million and will be funded by Hennepin County (as the plan concept is developed, the budget and size are subject to change). Committees and subcommittees representing Hennepin County, the City of Bloomington and the District Court are currently working on the development agreement, lease, building design, parking, etc., in order to propose a viable project to the Bloomington City Council for approval in 2016.

Justification

The new building will retain the availability of Hennepin County court services to south suburban communities including the City of Bloomington. In addition to saving Bloomington the costs associated with moving court services to downtown Minneapolis, this cooperative effort between Hennepin County and the City of Bloomington is an efficient use of overall taxpayer dollars.

Type Social & Cultural-Renewal
Useful Life 15-20 years
Category Playground Replacement
Priority 1

Project #	PD-03-022
Project Name	Brye Playground Replacement

Total Project Cost: \$95,469

Description
Replace playground equipment that meets current safety and accessibility standards (\$60,000), replace playground wood border with concrete border (\$10,000), grading (\$5,000), bike racks (\$800), two picnic tables (\$1,800), two benches (\$1,300), design/construction management (\$7,890) and contingency (\$8,679).

Justification
Replace playground with equipment that meets current safety and accessibility standards. Current equipment is reaching its useful life expectancy of 25 years (current equipment installed in 1991.)

Category Bush Lake
Priority 1

Project #	PD-03-026
Project Name	W. Bush Lake Parking Lot Reconstruction & Lighting

Total Project Cost: \$1,700,000

Description
Reconstruct parking lot, driveways, boat ramp, install lighting and make associated storm water management improvements. The overall construction costs for the north and south lots include: 160,434 sq. ft. at \$5.60 (\$898,431), lighting (\$270,400), design/engineering costs (25% of construction costs = \$292,208), contingency (15% of construction costs = \$219,156), and miscellaneous costs (\$19,850) for a total of \$1,700,000. The project is proposed to be funded through Metropolitan Council and State grants for the Metro Regional Park system. The project will be completed in two roughly equal phases (\$850,000 each) with the south lot starting in 2016 and the north lot in 2018.

Justification
Repair existing bituminous parking lots that are reaching its useful life expectancy. Improve water quality of parking lot runoff.

Project #	PD-09-002
Project Name	Bleachers Replacement

Total Project Cost: \$1,091,400

Description
Purchase new bleachers that meet current State safety codes to replace those that are reaching their useful life. Also install new concrete pads under bleachers. \$75,000 in 2017. The project will continue through 2035 with 77 bleachers @ \$10,000 (\$770,000), 77 concrete pads @ \$2,000 (\$154,000), plus 10% contingency (\$92,400).

Justification
Provide bleachers for spectators that meet current State safety codes.

Project #	PD-13-002
Project Name	Electronic Reader Board Sign

Total Project Cost: \$150,000

Description
Replace the manual reader board signs at Dred Scott and Valley View Playfields at an estimated cost of \$45,000 per site plus a 10% contingency. In future, install electronic reader board sign at Normandale Lake Park - SW corner of Normandale Blvd. & 84th Street (\$50,000).

Justification
Provide information on Parks and Recreation programs and facilities at two of the City's most heavily used parks. Use of electronic technology will eliminate manual changing of sign letters, thereby reducing staff costs.

Project #	PD-16-004
Project Name	Neighborhood Enhancement Park Improvements

Total Project Cost: \$300,000

Description
 Provide the following improvements to Wrights Lake Park: replace playground equipment, install additional trails, athletic field improvements and site grading, new picnic shelter, drinking fountain, adult fitness equipment, benches, picnic tables, resurface tennis courts and dual stripe for pickleball, enhanced park signage, artwork/sculpture, portable toilet enclosure.

Justification
 Replace playground with equipment that meets current safety and accessibility standards. Current equipment is reaching its useful life expectancy of 25 years (current equipment installed in 1991.) Make other park improvements to enhance the facilities for use by the community. The improved park would then serve as a catalyst for neighborhood renewal and pride.

Category Sewer
Priority 1

Project #	SW-14-001
Project Name	Trk San. Sewer Replc. 18th Ave & Bloomington Ave

Total Project Cost: \$4,000,000

Description
Replace aging MCES sanitary trunk sewers (42" RCP) with new 24" pipe and redirect flow to south on Bloomington Avenue. Connect to MCES intersection on 90th Street.

Justification
Old MCES 42" pipe is scheduled to be reconveyed to City. Re-routing flow from old pipe to south will free up pipe capacity for growth in both South Loop and as far west as Penn/American developments.

Project #	SL-06-003
Project Name	24th Avenue/American Blvd. East Leg (Part B)

Total Project Cost: \$5,225,236

Description
Improvements to the north side of American Boulevard and the east side of 24th Avenue. Estimated project year - 2018. Project cost estimated in 2011 dollars. Extend the west bound left-turn lanes 500 feet, construct an additional west bound right-turn lane. These improvements are for capacity reasons. This is part of the South Loop Traffic Plan and was identified as a need in the SRF Traffic Study. ID# 12B

Justification
Needed traffic improvement.

Project #	SL-07-002
Project Name	24th Ave. Transit Station (MOA Station)

Total Project Cost: \$25,000,000

Description
Enhance and upgrade 24th Avenue/Mall of America Transit Station. Pre-design study completed in 2013 by LSA and Metro Transit. Goals of the new design include: Improve efficiency of bus/train operations. Increase the exterior visibility and presence of the station. Improve station amenities, its aesthetic appeal, and visitor experience. Provide clear and convenient pedestrian access. Simplify access for mass transit vehicles.

Justification
Part of South Loop District Plan Implementation. Busiest transit station in state in need of enhancement and efficiency improvements (see also above.)

Project #	SL-16-001
Project Name	82nd Street (28th Ave. to 30th Ave)

Total Project Cost: \$2,250,000

Description
Extend 82nd Street between 28th Avenue and 30th Avenue. Cost assumes a level of finish similar to Lindau Lane and Bloomington Central Station Streets.

Justification
Needed traffic improvement as Bloomington Central Station develops.

Expenditures	2016	2017	2018	2019	2020	Total

Useful Life 30 years
Category Sidewalk/Bikeway
Priority 1

Project #	ST-16-003
Project Name	PMP ROW Trails Program

Total Project Cost: \$2,261,000

Description
2016- Design ROW 2017- Build Lindstrom (North side), Penn, Collegeview 90th to 3000 West. 2018- Begin ROW for France Ave: 94th Street to American Blvd. (West side) 2019- Build France Ave 94th to A.B (West side) 2020- Build Auto Club, MN Bluffs Drive and WBLR -W. These are reconstruction project and design standards updates.

Justification
Pavement has reached its useful life.

Expenditures	2016	2017	2018	2019	2020	Total
ROW/Design		550,000		850,000	861,000	2,261,000

Project # ST-16-004
Project Name Intersection Improv. at Olson and W 102nd St.

Total Project Cost: \$524,406

Description
 Driveway and sidewalk modifications at intersections of W 102nd Street and Olson Elementary and Middle School driveways. Will realign driveway and create a new sidewalk and school crossing to move pedestrians away from the driveway.

Justification
 Project will improve pedestrian and bicycle safety for students walking and biking to school (Identified in Safe Routes to School Plan) and reduce traffic congestion at the driveway. Applied for SRTS grant 1/8/16.

Expenditures	2016	2017	2018	2019	2020	Total

Project #	ST-99-003
Project Name	Overlay of City Streets

Total Project Cost: \$57,446,599

Description

Pavement Management Program: Overlay of City streets in accordance with City Pavement Management Program Policy. A portion of the overlay fund is designated to be used for existing pathway overlay and maintenance.

The Infrastructure Replacement Fund is a combination of State Aid Maintenance Funds and Franchise Fees.

Justification

Pavement Overlay is an integral component of Pavement Management Program. Overlaying pavement on a maintenance schedule increases the life of the road and decreases cost for replacement over the life of the street. Pathway overlays and maintenance on a schedule increases the life of the pathway and decreases cost for replacement over the life of the pathway.

The Infrastructure Fund is made up of a combination of franchise fees and Municipal State Aid.
