

## West Intersection Improvements

### Existing

- High number of vehicles entering southbound I-35W from eastbound 106th Street during the p.m. peak
- Westbound vehicles entering southbound I-35W must yield to eastbound vehicles entering southbound I-35W
- Results in long westbound queue and long delays on the southbound ramp

### Proposed

#### West Bloomington Freeway Closure

- Poor existing and future traffic operations
  - Long side-street delays
  - Drivers accept gaps that are not safe
- Improves access spacing
- Reduces conflict points
- Improves pedestrian and bicycle safety

#### River Terrace Closure

- Improves access spacing
- Reduces conflict points
- Needed to accommodate channelized right turn
