MNENERGYFIT.ORG

Energy Fit HomesSM is provided by the Center for Energy and Environment (CEE), a Minneapolis non-profit that has been helping Minnesota residents reduce their energy use for 35 years and Neighborhood Energy Connection, a St. Paul based nonprofit that has delivered high quality energy conservation services for 29 years.

Buying, selling or just staying put, it's never been more important to invest in your home's energy efficiency. Energy Fit Homes is a certificate program that focuses on energy efficient upgrades that are cost-effective to the homeowner, making it the only certification of its kind!

BENEFITS

Energy efficient upgrades can save you hundreds of dollars a year on your energy bills. With an Energy Fit Homes certification, you will benefit from cost savings and so much more:

- Improved indoor comfort
- Cost-effective upgrades
- Expert efficiency verification
- Added resale value

HOW TO QUALIFY

1. Schedule a home assessment

During your home assessment, an auditor will evaluate the performance and efficiency of 5 main areas of your home:

- Heating system
- Insulation and air sealing
- Windows
- Lighting
- Ventilation and combustion safety

2. Complete any necessary upgrades

The auditor will provide you with a list of upgrades necessary to achieve an Energy Fit Homes certificate.

3. Prepare your application

After all upgrades have been completed, submit an application and all documentation to receive your certificate.
