## It's easy to make a difference

Windsor is one of the nation's leading voluntary green energy programs, providing you with the opportunity to purchase affordable clean energy generated right here in Minnesota. A little wind can make a big impact.

## Choose your subscription level

Starting with one 100 kilowatt-hour (kWh) block, Windsor adds, on average, \$0.0085/kWh to your energy cost. You can even choose to offset 100% of your energy usage with wind power! Whether you sign-up for a little or a lot, your subscription supports local renewable energy. The Windsor charge is simply added to your Xcel Energy bill each month.

## No strings attached

With Windsor, there is no equipment to purchase or install. You can enjoy the benefits of clean energy without the hassle or risk.

## Windsource 2017 Historical and 2018 Prospective Product Content Label—Minnesota<sub>1</sub>

The product is sold in blocks of 100 kilowatt-hours (kWh); with the option to choose 100% renewable energy. The product will be made up of the following new renewable resources averaged annually:

### Green-e Energy Certified New Renewables<sub>2</sub>

Resource	Historical 2017 amount	Prospective 2018 amount	General location
Wind	100%	100%	Minnesota
<b>Total</b>	<b>100%</b>	<b>100%</b>	

#### Notes:

1. Prospective 2018 figures reflect the power that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the electricity you purchased. Historical 2017 figures reflect the power delivered to Windsource MN customers in 2017.
2. Xcel Energy currently has 20 wind farms whose output is dedicated, or partially dedicated to the Windsource program. Xcel Energy also purchases renewable energy credits on an as needed basis from Minnesota wind farms that may have sold their energy to other utilities. New Renewables come from generation facilities that first began commercial operation within the past 15 years.
3. For comparison, the current average mix of resources supplying Northern States Power customers includes: coal (30%), nuclear (29%), wind (18%), natural gas (12%), other renewables (10%) and solar (1%). [Source: Xcel Energy, 2018]
4. The average home in the United States uses 897 kWh per month. [Source: U.S. EIA, 2017]
5. For specific information about this electricity product, contact Xcel Energy at **800.895.4999** or **windsource@xcelenergy.com**, or visit **xcelenergy.com/Windsource**.

Windsource is Green-e Energy certified and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at [www.green-e.org](http://www.green-e.org).
